# INDEX

ABRAMOWITZ, A. A. Physiology of the melanophore system in the catfish, Ameiurus, 259.

Abstracts of scientific papers presented at Marine Biological Laboratory, summer of 1936, 386.

Aenoplex smithii, spermatogenesis of, cytological phenomena, 375.

Alcohol, effect on gastrulation in Arbacia, 413.

Ameiurus, physiology of melanophore system, 259.

Arbacia punctulata, cleavage without nuclei, 101.

ARMSTRONG, P. B. Mechanism of hatching in Fundulus heteroclitus (abstract), 407.

Ascidians, excretion in, rôle of blood cells, 249.

BACTERIA, multiplication in different volumes stored sea water, influence of oxygen tension and solid surfaces, 324.

Bacteroids, intracellular, of roaches, 433.

BALLARD, W. W. Observations on lens regeneration in Amblystoma (abstract), 388.

BEAMS, H. W., AND R. L. KING. The effect of ultracentrifuging upon chick embryonic cells, with special reference to the "resting" nucleus and the mitotic spindle, 188.

BEAR, R. S. *See* Schmitt, Bear and Young (abstract), 402.

BISSONNETTE, T. H. Modified sexual photoperiodicity in ferrets, raccoons and quail (abstract), 395.

Blood cells, in excretion, ascidians, 249.

BOWEN, R. E. Sensory hairs of the dogfish ear, 429.

BOZLER, E. The double refraction of smooth muscle (abstract), 402.

BRAMBEL, C. E. *See* Cowles and Brambel, 286.

BROOKS, MATILDA M. The effect of methylene blue on the spectrophotometric picture of hemoglobin, CO-hemoglobin and CN-hemoglobin (abstract), 386.

BURTON, ALAN C. The basis of the principle of the master reaction in biology (abstract), 393.

——, —— —. *See* Sichel and Burton (abstract), 397.

CALCIUM, free, in action of stimulating agents on Elodea cells, 306.

CAMERON, J. A., AND K. O. MILLS. Behavior of frog tadpole epidermal cells during seven successive regeneration periods (abstract), 405.

CAMERON, J. A. *See* Fisher and Cameron (abstract), 404.

Carotenoid metabolism, in surf perches, structure and function of gut in, 217.

CAROTHERS, E. ELEANOR. Cellular behavior in abnormal growths produced by irradiation of grasshopper embryos (abstract), 394.

——, —. ——. Components of the mitotic spindle, 469.

Catfish, melanophore system, physiology of, 259.

CHAMBERS, R. Experimental studies on the oil wetting property of the plasma membrane (abstract), 398.

Chick embryonic cells, effect of ultracentrifuging, with reference to "resting" nucleus and mitotic spindle, 188.

Chromatophores, blue, in some freshwater Protozoa, 492.

Chromosomes, salivary gland, structure as affected by mechanical distortion, 238.

CLARK, E. R., AND ELEANOR L. CLARK. Observations on conditions affecting growth of cells and tissues, from microscopic studies on the living animal (abstract), 405.

CLARK, JEAN M. *See* Mazia and Clark, 306.

CLAUS, PEARL E. *See* Guyer and Claus, 462.
